Ahmed Mohamed Fahmy

Front-End Web Developer (React, Angular & Vue)

Address: Cairo, Egypt
Phone: 01122764488
Github: AhmedFahmy36
Email:ahmedfahmy900122@gmail.com
LinkedIn: Ahmed Mohamed

A highly skilled Frontend Web Developer with a proven track record of designing and implementing high-performance, accessible, and fully responsive user interfaces. Proficient in the modern JavaScript ecosystem, including React , Angular and Vue with expertise in creating responsive layouts using both Tailwind CSS and Bootstrap. Dedicated to optimizing user experience and collaborating effectively with cross-functional teams to deliver scalable and maintainable web solutions.

Technical Skills

- **REACT**
- **Angular**
- **Clean Architecture.**
- **Next**
- **Git**
- **SOLID Principles**
- **Design Patterns**
- **Bootstrap and Tailwind**
- **Object oriented programing**
- **Data Structure & Algorithms**
- **API integration**
- **State Management.**

Experience

Front-End Developer | Intrazero, Egypt (Full-time) **[2024 – Present]**

- **Developed and maintained the company's core website, leveraging Next.js, React, and TypeScript to ensure optimal performance, responsiveness, and accessibility.**
- **Integrated complex UI/UX designs into robust, production-ready code, focusing on high visual fidelity and user interaction within the Next.js framework.**
- **Contributed to server-side frontend development by utilizing PHP, Laravel, and Blade templates for specific high-traffic application features and internal tools, ensuring effective API integration.**
- **Boosted SEO and load times through efficient server-side rendering (SSR) implementation and optimized routing in the Next.js application.**
- **Improved legacy codebases by conducting bug fixes, refactoring UI components, and aligning UX with modern industry standards.**

Education

Bachelor's Degree in Computer Science Future Academy, Cairo | GPA: 2.99 [2018 – 2022]

Projects

IAssets [2026] Live

- **Technologies & tools Used:** (React.js, TypeScript, Tailwind CSS, PHP, Laravel, API Integration)

At Intrazero, contributed to the development of a comprehensive assets management system tailored for medical facilities and diverse organizations. Designed and developed complex, professional administrative dashboards featuring dynamic data tables equipped with advanced filtering, sorting, and pagination to handle heavy inventory datasets efficiently. Engineered responsive user interface modules using React, while simultaneously building and optimizing backend PHP Laravel modules to ensure secure data processing, robust business logic, and seamless full-stack API integration Architected secure role-based access control (RBAC) and user authentication using JWT/Session tokens.

Task Management System [2026] Live

- **Technologies & Tools Used: (**Vue.js, Nuxt.js, TypeScript, Tailwind CSS, Pinia, REST APIs)

Designed and developed a responsive, full-featured Task Management System leveraging Vue 3 and Nuxt.js to deliver a fast, intuitive interface for tracking tasks and managing project workflows. Architected global state management using Pinia to handle real-time status updates, data filtering, and persistent user state across sessions. Utilized Nuxt's file-based routing, auto-imports, and server-side capabilities to build a clean, highly maintainable codebase, while styling modern dashboard views with Tailwind CSS for full cross-device responsiveness.

3Brothers [2025] Live

- **Technologies & tools Used:** (Html- CSS -Bootstrap- JavaScript – Ajax- php - Laravel)

At Intrazero, Executed the full frontend build for a corporate data show site, featuring a responsive design and an interactive, filterable product catalog based on technical specifications, engineered asynchronous form submissions (AJAX) for distributor and client lead generation, facilitating a fast, non-disruptive user flow, Developed and secured a robust sign-in system incorporating client-side validation for authorized access management. Developed a secure client and distributor portal featuring asynchronous (AJAX**) authentication, client-side input sanitization, and session handling to safeguard authorized access. Built a dynamic, multi-parameter product filter that allows users to instantly search and narrow down technical product specifications without page reloads.**

SVOIMDB [2025] Live

- **Technologies & tools Used:** (Html- CSS –Tailwind.CSS- JavaScript –React.Js- Vite).

A website of online library of trending movies and series with extra feature of showing their ratings similar to website like (IMDB) integrated with updated trending movies API (TMDB) .

MySpace — My own portfolio space themed [2025] Live

- **Technologies & tools Used:** (Html-CSS-Tailwind.css-Typescript-React-Next).

Designed and developed a fully responsive, immersive space-themed portfolio featuring a dynamic starry background and nebula effects.

Intrazero Website [2024] Live

- **Technologies & tools Used: (**React, Next ,SCSS, Bootstrap)

At Intrazero, developed and maintained the company's website ensuring optimal performance and a seamless user experience Collaborated with the UI & UX team to implement responsive and visually appealing UI components using HTML and SCSS. Integrated third-party APIs to enhance functionality and streamline the user interaction process, Worked closely with backend developers to ensure smooth integration and data flow between the frontend and API endpoints with good handling for server side and user side for good SEO.

StarWarsGeek [2024] Live

- **Technologies & tools Used:** (REACT.JS , CSS , Bootstrap , JavaScript)

A StarWars movies website that uses SWAPI to display star wars information as characters , films , planets , vehicles , species and spaceships for the fans of star wars universe developed with fun design for star wars geeks! .

Noxe — Movie Stream website [2024] Live

- **Technologies & tools Used:** (Html-CSS-Bootstrap-JavaScript-Angular).

A website of online library of trending movies, series and actors with extra feature of showing their ratings similar to website like (IMDB) integrated with updated trending movies API .
